Customer Problem Statement :

A problem statement captures the customer's point of view so the team can stay focused on what truly matters to them. For ShopEZ, the statements below describe the frustrations faced by busy shoppers and by sellers who manage their own listings, framed in the customer's own voice.

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A busy working professional	buy a specific gift quickly from one trusted site	I have to compare prices and items across many tabs and stores	products, reviews and discounts are scattered and hard to filter	Overwhelmed and short on time
PS-2	A first-time online shopper	check out and pay without creating risk	I am unsure whether my account and payment details are safe	many sites have unclear sign-in and confusing checkout flows	Anxious and hesitant to complete the order
PS-3	A small seller / store admin	list products and track incoming orders in one	I cannot easily update stock, prices or order	there is no single dashboard that shows products and orders	Frustrated and out of control of my own

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
