

Project Design Phase
Proposed Solution Template

Date	18 June 2026
Team ID	
Project Name	ShopEZ – MERN Stack E-Commerce Platform
Maximum Marks	2 Marks

Proposed Solution :

S.No.	Parameter	Description
1	Problem Statement (Problem to be solved)	Online shoppers often struggle to find relevant products quickly due to large catalogues, poor search experiences, and scattered order information. Store owners also face difficulties managing inventory and customer orders efficiently.
2	Idea / Solution description	ShopEZ provides a centralized e-commerce platform where customers can search, filter, and purchase products seamlessly while tracking their orders in real time. Administrators can manage products, inventory, categories, banners, and orders through a dedicated dashboard.
3	Novelty / Uniqueness	Dynamic product recommendations based on user shopping behavior, integrated category management from the admin panel, and a streamlined Buy Now flow that enables direct checkout without requiring cart navigation.
4	Social Impact / Customer Satisfaction	Improves digital shopping accessibility, reduces shopping effort, enhances customer confidence through transparent order tracking, and empowers local businesses with a simple online selling platform.
5	Business Model (Revenue Model)	Revenue can be generated through seller onboarding fees, premium seller subscriptions, sponsored product listings, targeted advertisements, and transaction commissions on completed orders.
6	Scalability of the Solution	The modular MERN architecture supports future expansion such as multiple sellers, payment gateway integration, AI-powered recommendations, mobile applications, cloud deployment, and microservice-based scaling.
